Towards Self Reliance

SIMA KAPAS PLUCKER, an ideal hand operated machine capable of increasing farmer cotton picking productivity by six folds and ensure least trash content. Automatic kapas collection bag attached to the machine prevents contamination.

Technical Specification

Model	Kapas Plucker
Size	280x90x110mm
Weight	600 grams
Motor Power	11 W
Voltage	12 V
Operating Current	1.4 A
Rotating Speed	5400 RPM
Battery Type	12 V rechargeable battery working time 8 Hours.
Charge Time	Approximately 8 hours

Operating procedure:

1. Load the battery in the hip bag
2. Wear the hip bag and tighten the belt
3. Connect the power pluck in the battery and in the machine
4. Tie the kapas collection bag in the hip
5. Insert the machine delivery end to the kapas collection bag and tighten
6. Switch on the battery
7. Switch on the machine and pluck the cotton
8. Remove the kapas collection bag with 4 to 5 Kgs of kapas and transfer the kapas to the contamination free bag
9. Charge and maintain the battery as per the details given in the battery manual to ensure long life
10. Handle the equipment with care and avoid handling by children

Salient Features:

1. Affordable price and quick return on investment
2. Reduce picking cost upto 70%
3. Productivity: More than 6 times of hand picking
4. Contamination free cotton
5. Least trash
6. User friendly
7. Suitable for picking all types of cotton
8. Least maintenance
9. Comes with essential spares, accessories, tools, extra motor and safe kit to preserve the equipment
