Agro Advisory

Crop	Stage	Advisory
General		Light rainfall with high wind speed of 8 - 16 km/hr in Western Zone districts during next five days. The Coimbatore and Tiruppur districts may have very high windspeed up to 16 km/hr. Irrigation may be provided to all crops based on soil moisture.
Rice	Sowing	Anticipating rainfall, samba season nursery may be prepared for sowing medium duration rice.
Maize		This is best time for sowing irrigated maize for reaping potential yield. Irrigation may be provided to all crops based on soil moisture.
Groundnut		Weather conditions is favorable for the tikka leaf spot incidence in Groundnut and monitor the incidence if necessary spray Carbendazim 500 gram or Mancozeb 1000 gram per ha.
Sugarcane	Vegetative	Since rainfall with squally wind is expected, dethrash and propping in five months old sugarcane crop is recommended against the lodging.
Cotton		This is the best time to take up irrigated cotton by utilizing expected rain fall. Provide life irrigation, if soil moisture is not sufficient.
Gourds	Sowing	Since rainy season is started, this is the best time for take-up sowing gourds and other cucurbits.

Banana	Above 5 months old	Rain fall with 14-16 km/hour wind speed may cause lodging in banana. Provide support to five months and above old banana.
Animal Husbandry		<p>Feed material of poultries may be drifted due to high wind speed and hence, hang gunny bags at the borders of the shed to reduce wind speed.</p> <p>Present weather may force the animals to take more drinking water. Provide enough cleaned drinking water to the animals.</p> <p>Inspect the animals for the symptoms of foot and mouth disease.</p>

SMS advisory

- This is the best time to take up winter irrigated cotton by utilizing expected rain fall. Provide life irrigation, if soil moisture is not sufficient.
