General Advisory:

Extended range Forecast for next week (07th – 13rd July 2023):

Rainfall:

As per extended range predictions, there is possibility of near normal to slightly above normal rainfall likely over the district during 07th to 13rd July 2023.

Maximum Temperature:

Maximum temperatures is likely to be near normal and are likely to be in the range 28°C to 34°C over the plains of the district during next week. 07th to 13rd July 2023.

Minimum Temperature:

Minimum temperatures are likely to be near normal and are likely to be in the range 18°C to 24°C over the district during next week 07th to 13rd July 2023.

Heavy rain is likely to occur at one or two places over the district on 5, 6 & 7 July 2023. Farmers are advised to act swiftly to repair the water channels, farm ponds and other water bodies to harvest the rain water. During these days farmers are advised to avoid irrigation, intercultural operations and application of plant protection measures to the standing crops, provide adequate drainage facilities in the fields to avoid water stagnation due to heavy rainfall, do not allow the animals to grazing outside, standing near the trees or electric poles & provide safe shelter.

Weather Based Agro-Advisories: (Guava, Coconut & Animal Husbandry).

Guava:

The incense of Tea mosquito bug in Guava. The pest incidence was noticed on young leaves and fruits of Guava.

To manage this pest, farmers are advised to collect and destroy the damaged plant parts and do regular pruning. Shade regulation facilitates proper penetration of sunlight inside the canopy which reduces the incidence of this pest.

Spray Neem oil @ 50ml + Pungam Oil @ 10ml with 10litres of water.

Coconut:

The incidence of Black-headed caterpillars is expected in the Coconut crop. Coconut trees of all ages are attacked by this pest. Dried-up patches on the leaflets of the lower leaves, only three or four youngest leaves at the center of the crown remain green.

Galleries of silk and frass are found on the underside of leaflets. In case of severe infestation, the whole plantations present a scorched appearance.

To control, root feeding of Fipronil @ 25ml with 75ml of water per tree is recommended.

Animal Husbandry:

Goat rearing farmers are advised to prevent the goat from Tapeworm, which leads to mortality and weight loss.

Goats have to be de-wormed from July to September, if not yet done, contact the nearby veterinarian and provide deworming medicines to your goats.
