## Weather Warning on Agriculture

Due to thunderstorms and lightning keep livestock away from tall buildings & trees.

Provide adequate drainage facilities in the field. Avoid Spraying of fertilizers, herbicides on 04.04.25 to 06.04.25. Spray on non-raining days.

## Agro Advisory

Crop	Stage	Advisory
General		<p>Moderate to high rainfall is expected during 3-5<sup>th</sup> April 2025 and the wind speed would be around up to 04-10 kmph in Western zone districts.</p> <p>Summer ploughing in recently harvested and fallow lands with inverting type plough against the slope may be done to harvest the summer rain and reduce run off and erosion.</p> <p>Rainfall is expected. Hence postpone the irrigation based on soil moisture.</p>
Cumbu		<p>Sowing of Cumbu may be taken up during first week of April, by utilizing the expected rainfall.</p>
Vegetable & flower crops		<p>Rainfall is expected. Hence, spraying of chemicals for sucking pests may be postponed. Spray Spinetoram 11.70% SC @ 450ml/ha to control thrips after rain.</p>
Tapioca	Planting	<p>With the receipt of rainfall, planting of Tapioca may be taken up during the first week of April in prepared land.</p>
Coconut		<p>Provide inward basin around the tree crops with 1.5m radius from the trunk to harvest the expected rainfall in root zone.</p> <p>Provide inward basin around the tree crops with 1.5m radius from the trunk to harvest the expected rainfall in root zone.</p> <p>Provide 100 lit of water per tree per day with drip irrigation and apply mulches in the basin to avoid evaporation loss.</p> <p>Due to high temperature Rugose spiraling whitefly incidence is increasing.</p> <p><b>To control Rugose whitefly</b>, adopt the following IPM measures</p> <ol style="list-style-type: none"><li>1. Yellow sticky traps / sheets (3 x 1ft / 5 x 1ft) @ 20 sheets / ha at 5-6 ft. on trunk smeared with castor oil.</li><li>2. Staple leaflets containing Encarsia guadeloupe parasitized cocoons @ 100 Nos. / ha on under surface of infested leaflets.</li></ol> <p>Staple paper strips / cardboard boxes containing Chrysopid eggs @ 1000 / ha</p>

		<p><b>Root Wilt (Candidatus Phytoplasma)</b></p> <ul style="list-style-type: none"> <li>• Recommended NPK + FYM-50kg + Neem Cake 5 kg / palm/yr + Green Manuring</li> <li>• Azospirillum – 200g + Phosphobacteria - 200g + VAM – 100g + Bacillus subtilis – 200g + Trichoderma asperellum 200 g / palm / yr</li> <li>• TNAU Coconut tonic root feeding @ 40 ml / palm at 6 months interval</li> <li>• Soil application of ‘TNAU COCOCON’ @ 5 litre / acre at 3 months interval</li> </ul> <p>Need based Root feeding of hexaconazole (3ml + 200 ml water) for leaf Rot</p>
Animal Husbandry		Heavy rainfall may occur along the Western Ghat areas and hence avoid grazing near foot hills of Western Ghat areas.

**SMS advisory:**

- Moderate to high rainfall is expected during 3-5<sup>th</sup> April 2025. Summer ploughing may be completed immediately against the slope to harvest the summer rain and reduce run off and erosion.
