Average wind speed is expected to be around 10 - 12 km per hour and the wind directions will be from north east direction. wind directions will be from east north east direction.

### Agro Advisory

<b>General</b>		Link the drainage channel with farm ponds towards efficient water drainage besides the rain water storage.
<b>Rice</b>		The prevailing weather condition is favourable for gall midge infection. It leads to the formation of onion like leaf and prevents panicle formation. To control this apply chloripyriphos 20 EC 500 ml/ha or Beauveria bassiana 5 gram / 1 litter after rain cessation.
		If leaf folder symptoms found (folded leaf, white scrape on leaf) avoid excessive nitrogenous fertilizers, remove weeds and Release Trichogramma chilonis @2 cc (40,000/ ac). Spray Phosalone 35 EC 600 ml/ha or Carbosulfan 6% G 16.7 kg/ha or Cartaphydrochloride 50 % SP 1000 g/ha.
<b>Cattle</b>	<b>Cow and Goat</b>	The prevailing night time temperature is favorable for pneumonia formation in cattle. To reduce the risk of pneumonia, cow, goat and calves shouldn't be left out in open condition during night. A suitable night time shelter with enough heating provision must be given.

### **SMS advisory**

Link the drainage channel with farm ponds towards efficient water drainage besides the rain water storage.
