### Weather Summary for Thanjavur district

According to district forecast issued by the India Meteorological Department for Thanjavur district, sky will be clear. Light drizzling expected on 31.05.2025. Maximum temperature is expected to be around 27 - 37 °C. Minimum temperature is expected to be around 26 - 27 °C. Morning relative humidity is expected to be around 80 per cent and evening relative humidity is expected to be around 60 per cent. Average wind speed is expected to be around 18 - 20 km per hour and the wind directions will be from west south west direction.

### Agro Advisory

<b>General</b>		Since slight and light rainfall is expected, irrigate the field as and when required.
<b>Rice</b>	<b>Nursery</b>	Roots of 18 to 22 days of old young seedlings need to be dipped in biofertilizers (1 kg or 125 ml of each <i>Azospirillum</i> and phosphobacteria mixed in 40 litre of water and dipped) for 15 to 30 minutes before transplanting.
<b>Cotton</b>	<b>Vegetative</b>	Prevailing weather condition favours shedding of buds and squares in cotton. To prevent this spray 40 ppm NAA at 60 and 90 days after sowing.
<b>Sugarcane</b>	<b>Vegetative</b>	Considering weather conditions, detrashing and propping of five months old sugarcane is recommended.
<b>Coconut</b>		Considering optimum weather condition, root feeding of coconut tonic @ 200 ml / palm can be done.
<b>Banana</b>		Provide support with wooden poles to avoid lodging of tree due to wind.
<b>Cattle</b>	<b>Cow</b>	Farmers are advised provide sufficient mineral mixture to nourish the cattle health.

**SMS advisory**

Since slight and light rainfall is expected, irrigate the field as and when required.
