

## **Guidelines for Paddy Mission under NADP-2014-15**

### **Components**

1. Distribution subsidy for Certified Paddy seeds
2. Popularization of Machine transplanting Paddy
3. Promotion of weedcides
4. Promotion of application of Copper Sulphate
5. Distribution of Boom sprayer to the farmers Groups

#### **1. DISTRIBUTION SUBSIDY FOR CERTIFIED SEEDS**

The productivity of rice crop mainly depends on the suitable variety and quality seeds. Quality certified seeds attributes to 10% increase in yield. The department produces 18700 MT of certified seeds every year to cover an area of 17%. The balance requirement of 83% of the seeds is met through Co-Operative, private dealers and through farmer's exchange. In order to maintain the seed replacement ratio (SRR), distribution of enough quantity of quality seeds is highly essential. During 2014-15, the distribution of quality seeds is proposed @ 50% of the total cost or Rs.10/Kg whichever is less under NADP.

Subsidy is proposed to be provided for distribution of Hybrid / High yielding varieties through Department and Co-operative.

#### **2. Popularization of Machine transplanting in Paddy**

In order to promote SRI cultivation, transplantation with labour is very tedious process and the availability of labour is also very poor. Due to this problem, the farmers are planted the old age seedlings which reduce the number of productive tillers thus lead less yield. Hence, this can be promoted by providing subsidy of Rs 3750/ha as backended subsidy through ECS to the farmers who will transplant the seedlings by using transplanter as modified SRI technology.

Field level functionaries will ensure planting and weeding in field level. After ensuring and with the recommendation of AAO and AO, back ended subsidy will be released through ECS to the beneficiary.

#### **3. Promotion of weedicide**

In paddy crop, alternate wetting and drying provides space for higher weed infestation. The weeds reduce the crop yield upto 20% by competing for light, space, nutrient, water and affect the quality of the grain. By application of systemic post-emergent weedicide, it controls

the monocot and dicot weeds in the paddy field effectively and reduces the competition for nutrients, water, space between weeds and plants which in turn increases the yield. Hence, it is to be distributed the weedicides at Rs.500/ha or 50% of the total cost whichever is less. Weedicides can be procured through tender and distributed through Agriculture Extension Centres.

#### **4. Promotion of application of Copper Sulphate**

Irrigation is more important in Paddy crop. When the Paddy field irrigated with well water or allowed for flooded condition which will increase the algal growth that affect the aeration, Sunlight and compete with the plants for nutrition. Hence 2.5 Kg /ha of Copper sulphate is recommended to control the algal growth. Hence it is to be distributed the Copper sulphate @ 50% subsidy or Rs 500/ha whichever is less.

#### **5. Distribution of Boom sprayer to the Groups**

Irrigation is more important in Paddy crop. In order to reduce the water use efficiency, boom sprayer can be recommended for spraying. This can be utilized to spray the water and PPFM in the crucial periods. Hence it is to be distributed at 2 nos of Boom sprayer to the Groups per block @ free of cost. Boom sprayer can be procured through tender and distributed through Agriculture Extension Centres.

#### **The following operational guidelines are issued for implementing the scheme.**

1. Adequate publicity should be given about the scheme in News papers, AIR, leaflets, pamphlets, etc. and willingness should be invited from the farmers on plain paper.
2. The name of the farmers expressing willingness to avail benefit under the scheme shall be entered in a priority register, maintained in the AEC (Format in Annexure-I).
3. The Assistant Agriculture Officer will select the farmers from the priority register based on the seniority and will obtain application in Annexure-II from them and recommend the application to the Assistant Director of Agriculture through Agricultural Officer / Deputy Agricultural Officer along with the following documents.
  - a. Farmers Integrated Hand Book (FIHB) or computerized Chitta should be obtained from Taluk Office.
  - b. Identification of farmers by Voter ID / ration card or FIHB.
4. The beneficiary selected should find a place in the farm family register maintained by the Asst. Agricultural Officer.

5. Priority will be given to the farmers who have not been benefited under this scheme earlier.
6. Only after covering all the farmers in the farm family register, the AAO can recommend for repetition of beneficiaries subject to the seniority as per priority register.
7. The list of farmers selected for issue of inputs should be displayed on the notice board of the AEC and should be uploaded on the AGRISNET web site.
8. The input should be distributed immediately on receipt of application.
9. In case of back ended subsidy it should be disbursed within 60 days of transplanting.
10. The receipt of stock for critical inputs should be verified by the Assistant Director of Agriculture.
11. Proper billing of inputs should be done in the Agricultural Extension Centre and record should be maintained for the transaction.
12. As stipulated in the NADP guidelines, at least 20% of the benefits should be given to SC/ST farmers.
13. Documentation such as photos taken before and after cultivation of SRI.
14. An information board displaying salient details such as name of the scheme, name of the beneficiary, year, subsidy amount etc. should be displayed in the SRI demonstration plots.
15. Maximum assistance under this scheme is restricted to one hectare per beneficiary.

**Disbursement of back ended subsidy (Rs.3750/Ha for machine transplanting)**

1. Farmers should furnish a separate application to the Assistant Agriculture Officer for reimbursing the transplanting charges along with Photostat copy of the Bank Pass book providing information of Account holder Name, Address and A/c No. (Model application form in Annexure III).
2. The AAO, after verifying whether all the technologies have been followed, will recommend the application to the ADA through Agricultural Officer / Deputy Agricultural Officer for disbursing the cash component of the subsidy. While recommending the application the AAO should mention the bill no. and date of issue of inputs.
3. Agriculture Officer should verify 100% of the fields.
4. The subsidy amount should be settled to the farmers by means of ECS/Account payee cheque. Payment should be made through Account Payee Cheques only in cases where ECS facility is not available.

5. The acknowledgement for the receipt of cheque should be furnished by the beneficiary.
6. The block Assistant Director of Agriculture should verify a minimum of 20% of fields, Deputy Director of Agriculture (GOI) and DDA(SS) each should inspect 5% and the Joint Director of Agriculture should inspect at least 2% of the fields.
7. A Register of these transplanted fields should be maintained with the concerned farmer's photo affixed along with the detail of inputs distributed (format in Annexure IV). This register should be maintained at Block level and a separate register should be maintained for each year.
8. After the completion of the work the AAO should make necessary entries in AGRISNET for each beneficiary.
9. Documentation should be done by uploading the success stories in AGRISNET.

### **District Level Monitoring Committee**

1. A District Level Monitoring Committee headed by the District Collector and comprising of the following officials as members will monitor the implementation of the scheme at the district level.

- |  |                         |
|--|-------------------------|
| i. Joint Director of Agriculture                 | Convenor/Member         |
| ii. PA Agri to Collector<br>Member               |                         |
| iii. Deputy Director of Agriculture (GOI)        | Member                  |
| iv. Scientist (KVKs)<br>Member                   |                         |
| v. Executive Engineer (Agricultural Engineering) | Member                  |
| vi. Deputy Director of Horticulture<br>Member    |                         |
| vii. Deputy Director of Agricultural Marketing   | Member                  |
|  | Sd/- M.Rajendran        |
|  | Director of Agriculture |
