AGRONOVA 2K22

- Climate change as a perk for agriculture

Date: 4th & 5th July, 2022

Venue: Anna Auditorium

Agricultural College & Research Institute
Tamil Nadu Agricultural University
Coimbatore – 641003

A State Level Agricultural Meet

AGRONOVA

Agronova, a scientific celebration that presents a convivial welcome to the future pillars of the Indian nation. This grand function assures every contestant, a lateral platform to prove themselves by provoking their hidden talents. Agronova'22 genially invites all the talented minds who are passionately curious to explore and know things on India's backbone – the agriculture, nothing more expensive than a missed opportunity, so come and hit our targets with your talents.

“Success is where preparation and opportunity meet”

ABOUT TNAU

One of the forerunner institutes in Agricultural Research, Development and Education, established in 1971. This institute offers 10 Under graduate degree programs, 33 Post graduate degree programs and 29 Doctoral programs in 15 colleges across the state. Working tirelessly for the welfare of the farmers through 38 Research Stations and 14 KVKs (Farmers Science Centres). Our glory tells about our history and innovations reflects the future.

CONCEPT

Climate-smart agriculture is a pathway towards development and food security built on three pillars:

- Increasing agricultural productivity and income
- Strengthening resilience to climate change and variability
- Reducing greenhouse gas emissions

Climate-smart agriculture contributes to a cross-cutting range of development goals. Agricultural sectors must become climate-smart to successfully tackle current food security and climate change challenges.

Regional, national and international policies must be reviewed to better reflect the need for consistent and comprehensive approaches for developing the agricultural sector, addressing climate change and safeguarding food security.
