The Editor,  
Sir,

Date: 19.05.2025

I request that the following message may kindly be published in your esteemed daily:

### **TNAU to celebrate World Bee Day**

Bees are fascinating creatures. They engage in pollination, enhancing crop yields and providing bee-related products. Public interest in bees has been growing day by day. To raise awareness about bees, “World Bee Day” is celebrated on May 20<sup>th</sup>, the birth anniversary of Anton Jansa, a renowned 18th-century beekeeper. This year, in 2025, the primary focus of World Bee Day is to raise awareness of the essential role bees play in food and nutrition production, under the theme “Bees Inspired by Nature to Nourish us all”

In line with this, Tamil Nadu Agricultural University, through its Entomology Department, will celebrate “World Bee Day” on Tuesday, May 20. The event will feature basic information about bees, honey production, and harvesting techniques. Additionally, demonstrations on making sculptures and soap from beeswax, as well as the preparation of products like amla honey and honey gulkand, will be provided. To encourage interest in bees, various bee-related games will be organized for children, and prizes will be awarded to winners. Certificates will also be distributed to all participants at the end of the event. We warmly invite interested children, students, youth, and homemakers to participate in this World Bee Day celebration and benefit from it.
